

Annex 25
Specific Hazard Annex
To
Florence County EOP

I. Introduction

This annex identifies a variety of potential threats that could impact Florence County. This annex is designed to address operational procedures as they relate to each of the specific hazards.

Florence County uses a multi-hazard approach to disaster management and information contained in the basic plan should always be assumed to apply to any hazard unless it is specifically stated otherwise in the following appendices.

Just as with the ESFs addressed elsewhere in this plan, there are additional SOGs for these specific hazards that are maintained by the responsible department or agency.

II. State Interface

The state agency that is responsible for this annex is the SC Emergency Management Division (SCEMD). Each of the following specific hazards has coordinators within SCEMD who serves as subject matters experts for these topics and in some cases stand alone, single hazard plans exist to provide additional details.

Appendixes:

- A - H.B. Robinson Site Specific
- B - Hurricane
- C - Terrorism
- D - Dam Failure
